For more information, visit: www.switchafricagreen.org
The overall objective of SWITCH Africa Green is to support 6 countries in Africa to achieve sustainable development by engaging in transition towards an inclusive green economy, based on sustainable consumption and production patterns, while generating growth, creating decent jobs and reducing poverty. The objective will be achieved primarily through support to private sector led inclusive green growth.

The Green Business component aims at supporting transformation towards an inclusive economy by providing services to MSMEs that enable them to start and develop resource efficient and green business based on sustainable production practices.

The Networking Facility component aims at providing project support services such as fostering the networking and communication among the projects and countries, distilling knowledge from project implementation for wider replication and facilitation of policy uptake.

The Policy Support component aims to respond to the specific needs of each pilot country, building on and scaling up activities to strengthened institutions and appropriate tools and instruments.

The Networking Facility component aims at providing project support services such as fostering the networking and communication among the projects and countries, distilling knowledge from project implementation for wider replication and facilitation of policy uptake.

In addition to the priority sectors, the country-specific projects address cross-cutting themes: Energy efficiency, Labelling and standards, Water efficiency, Eco-innovation and Sustainable trade.

Majority of employees are youth and women
